Meaningful Use Business Process Mapping Questionnaire	
This survey is designed to facilitate conversations between health care facilities and public health departments before and during Meaningful Use implementation and onboarding.	
Please feel free to consult others when answering this survey, particularly if you are unsure of an answer. None of the questions are required so if you are unable to find a definitive answer please leave that question blank.	
The survey should take between 30-45 minutes to complete.	
Thank you for your time!

Facility Information

2. Facility Name	
3. What state/public health jurisdiction is your facility in?	
4. Healthcare system name	
5. Facility type (please select all that apply)	
Hospital	
Urgent care center	
6. If your facility is a hagnital is it a critical assess beenital (CALIVA	
6. If your facility is a hospital, is it a critical access hospital (CAH)?	
Yes	
○ No	
7. What is the average count for each of the following:	
Emergency department (ED) visit count (avg per day, over the last month)?	1
Urgent care (UC) visit count (avg per day, over the last month)?	
Number of admissions that originate in the ED (avg per day, over the last month)?	
8. If applicable (i.e., if you send inpatient data) what is the count of	each of the following:
Number of inpatient admissions (avg per day, over the last month)?	
Bed count?]
200 000	

EHR Vendor Information - Emergency Departments (ED)

Please respond to this section based on the current capability of your Electronic Health Record (EHR) system to generate syndromic surveillance messages.
9. Please indicate the current status of sending syndromic data for ED patients to public health.
We currently send syndromic data for ED patients.
We do not currently send syndromic data for ED patients but we do have plans to send syndromic data for ED patients in the future.
We do not currently send syndromic data for ED patients and we have no current plans to send syndromic data for ED patients.

EHR Vendor Information - General

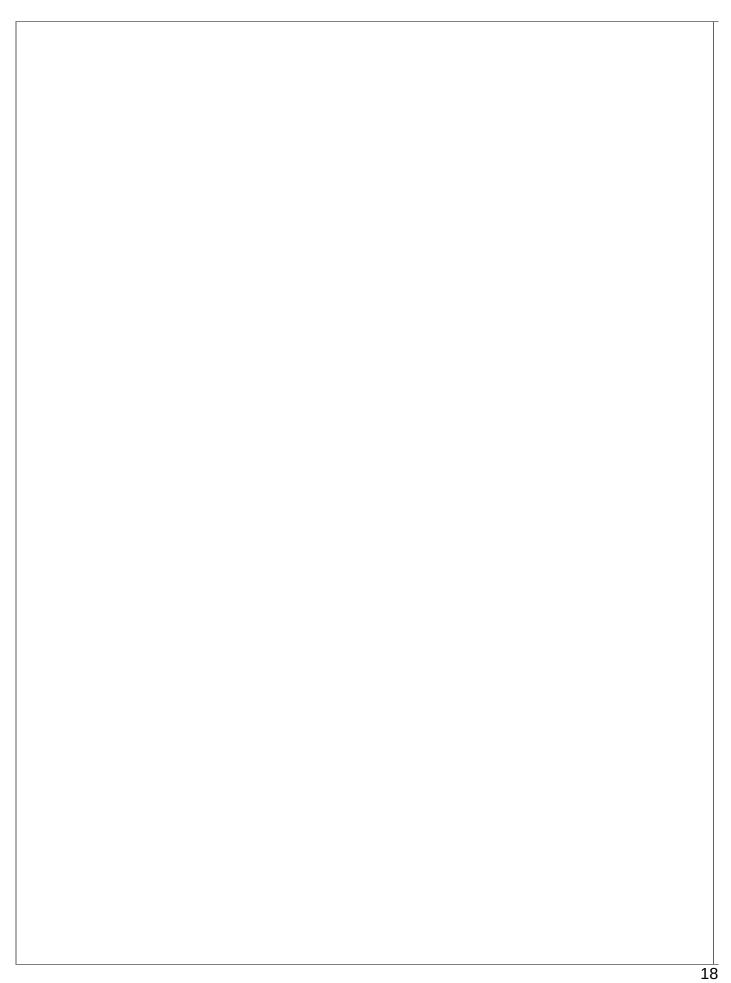

30. Do you use an interface engine or other intermediary software in addition to your EHR product to build messages to the requested specifications?
Yes
○ No
Unsure
31. Do you use a separate system for creating test messages?
Yes
○ No
32. Will you be using test or dummy data for generating your test messages?
Yes
○ No
33. Are there plans to change your EHR vendor(s) in the next year? Please select all that apply.
Yes - for ED
Yes - for UC
Yes - for inpatient
Maybe
No No

Meaningful Use Business Process Mapping Questionnaire **Facility Workflow** 34. Please describe your facility's workflow for registering, admitting, updating, and discharging patients in your EHR system. i.e., when is chief complaint assigned? when is admit reason assigned? when is initial diagnosis assigned? final diagnosis? Please ensure that all steps from registration to discharge, including updates, are captured in this workflow description. 35. What type of ADT messages does your facility send for the following trigger events? Specify the ADT message type(s) (e.g., A04) that you send for Registration events In a typical week, what percentage of ADT messages from your facility are Registration messages? (please indicate as a range) Specify the ADT message type(s) (e.g., A08) that you send for Update events In a typical week, what percentage of ADT messages from your facility are Update messages? (please indicate as a range) Specify the ADT message type(s) (e.g., A03) that you send for Discharge events In a typical week, what percentage of ADT messages from your facility are Discharge messages? (please indicate as a range) Specify the ADT message type(s) (e.g., A01) that you send for Admit events

In a typical week, what percentage of ADT messages from your facility are Admit messages? (please indicate as a range)

Data Element Information 46. Do you have a mapping document you can share with the public health authority? Yes No Unsure 47. How are patient IDs (PID 3) assigned? For instance, is the patient ID ever recycled within your EHR for other patients? If so, how frequently? 48. How are visit numbers assigned (PV1-19)? e.g., is the visit number ever recycled within your EHR for other patients? Can a patient have multiple visit numbers for a single visit? 49. Please indicate whether or not you are able to send each of the following data elements in the specified field(s)/format(s). Yes No Unsure Are you able to send admit reason in PV2-3.1 as an ICD-9/10 or SNOMED code? Are you able to send admit reason in PV2-3.2 as free text? Are you able to send diagnosis code in DG1-3.1? Are you able to send chief complaint in the OBX segment as free text? Are you able to send chief complaint in the OBX segment as an ICD-9/10 code or SNOMED code? Are you able to send triage note in the OBX segment? Are you able to send clinical impression in the OBX segment?

Meaningful Use Business Process Mapping Questionnaire

Whe	en is chief complaint entered?
Who	enters the chief complaint information?
Is ch	nief complaint stable, or does it change (i.e., between a registration and update message)?
Is ch	nief complaint coded, drop down menu, or free text?
How	does the facility code chief complaint/reason for visit? Are they different?
	When PV2 (patient visit) and DG1 (diagnosis information) are sent together, is PV2 repeated in the 1 segment?
	Yes
\bigcirc	No Unsure
52.	Will the discharge disposition (PV1-36) be captured for each visit in the A03?
	Yes
	No
	Unsure

Meaningful Use Business Process Mapping Questionnaire
Thank you!
Thank you for taking the time to fill out this survey. We hope it facilitates valuable conversations between you and your public health authority regarding submission of syndromic surveillance messages.
